The averages presented here are simple averages for the authorities listed (excluding the LA selected). They provide a simple comparator of the performance indicators without placing too much emphasis on any one Local Authority. Where data does not exist for an LA it is excluded from the mean calculation.

Description:

Number of children looked after on 31 March expressed as a rate per 10,000 children aged under 18.

Methodology:

Historical data may differ from older publications. This is mainly due to the implementation of amendments and corrections sent by some local authorities after the publication date of previous materials. England totals have been rounded to the nearest 100 if they exceed 1000, and to the nearest 10 otherwise. Regional totals have been rounded to the nearest 10. Other numbers have been rounded to the nearest 5. See Technical Notes in the actual SFR pdf document for more information on rounding. The rates per 10,000 children under 18 years have been derived using the mid-year population estimates for 2009 provided by the Office for National Statistics.
